

Jean Pierre Segura Castañeda

Frontend Developer · React · TypeScript

Bogotá, Colombia · [linkedin.com/in/jpsegurac](https://www.linkedin.com/in/jpsegurac) · +57 300 844 1007 · jpsc1117@gmail.com

PROFESSIONAL SUMMARY

Software Developer with 3+ years of experience building and maintaining high-traffic web applications across fintech, hospitality, and entertainment. Specialized in React and TypeScript with a strong focus on reusable component architecture, render performance, accessibility (WCAG 2.1), and design systems. Proven track record working in distributed agile teams and English-speaking environments. Proficient in AI-assisted development using GitHub Copilot and ChatGPT to accelerate delivery cycles.

PROFESSIONAL EXPERIENCE

Mercado Libre · Software Developer — Frontend

Jan 2025 – Jan 2026

Bogotá, Colombia

- ▶ Reduced dashboard load time for the remunerated account module in Chile by migrating legacy implementations to the Andes corporate design system using React, TypeScript, and SCSS, eliminating redundant dependencies.
- ▶ Accelerated feature delivery by ~25%* across my team by adopting GitHub Copilot and ChatGPT as daily GenAI coding assistants, and documenting usage patterns to streamline onboarding for new developers.
- ▶ Cut visual regression rates across 4 markets (Chile, Mexico, Argentina, Brazil) by implementing unit tests with Jest and React Testing Library on critical payment flow components.
- ▶ Identified and resolved production performance degradations by monitoring metrics with Datadog, reducing middle-end (Golang) average response time by ~10%* through builder and country-specific logic adjustments.
- ▶ Contributed to reusable component architecture within the corporate design system under a Mobile First approach, ensuring visual consistency and WCAG 2.1 accessibility compliance across multiple countries and platforms.

Key Achievements

- ▶ End-to-end migration of the remunerated account dashboard for Chile — delivered on schedule with zero production incidents.
- ▶ Replaced legacy UX library implementations across 4 countries with standardized Andes components, significantly reducing technical debt.

Tambourine · Frontend Developer

Oct 2023 – Jan 2025

Bogotá, Colombia

- ▶ Raised the average SEO score of hotel brand websites (Hilton, Marriott, Charleston) from 72 to 95/100* by applying technical SEO best practices and WCAG 2.1 accessibility standards on a Vue-based CMS platform.
- ▶ Reduced QA cycle time by 30%* by introducing e2e tests to validate visual regressions, ensuring pixel-perfect delivery from Adobe XD designs.
- ▶ Shortened feature development cycles by ~20%* by building a reusable component library in Vue + SCSS, reused across 15+ client projects.
- ▶ Improved codebase maintainability by refactoring decoupled SCSS styles into BEM-architected modules, facilitating collaboration in a distributed team environment.
- ▶ Participated in technical meetings in English with international clients (Hilton, Marriott) and PMS teams to translate functional requirements into clean, consistent user experiences.

Decibeles · Frontend Developer

Jul 2022 – Jun 2023

Bogotá, Colombia

- ▶ Maintained >99%* uptime for a digital platform serving artists and music-industry associations by managing production bug fixes and functional improvements using HTML, CSS, Bootstrap, and JavaScript.
- ▶ Reduced incident resolution time by 40%* by implementing monitoring on critical data displays and improving client support workflows, enhancing overall platform stability.

TECHNICAL SKILLS

Core Frontend: React 18, TypeScript, JavaScript (ES2022+), Vue 3, Next.js

State & Architecture: Zustand, Redux, Context API, Custom Hooks, HOCs, React Query

Styling & Design: SCSS, CSS Modules, Tailwind CSS, Bootstrap, Figma, Mobile First

Testing: Jest, React Testing Library, Cypress (e2e), Vitest

Observability: Datadog, Kibana (basic), NewRelic (basic)

DevOps & Tooling: Git, GitHub Actions, CI/CD pipelines, Vite, Webpack

Backend / APIs: Golang (middle-end), Node.js (basic), REST APIs, GraphQL

GenAI Tools: GitHub Copilot, ChatGPT, Cursor — intensive daily use in dev workflow

Best Practices: WCAG 2.1 Accessibility, Technical SEO, Clean Code, Code Review

EDUCATION

Universidad Nacional de Colombia · B.S. Mechanical Engineering

December 2021

Bogotá, Colombia

LANGUAGES

Spanish: Native · **English:** Professional working proficiency (B2/C1) — technical meetings, documentation, and client communication
